The book addresses the issue of integration and interaction of the bioinspired techniques in system dependability computing so that intelligent decisions, design, and architectures can be supported. It brings together these emerging areas under the umbrella of bio- and nature-inspired computational intelligence. The primary audience of this book includes experts and developers who want to deepen their understanding of bioinspired computing in basic theory, algorithms, and applications. The book is also intended to be used as a textbook for masters and doctoral students who want to enhance their knowledge and understanding of the role of bioinspired techniques in system dependability. Provides the latest review Covers various nature-inspired techniques applied to RAMS+C and PHM problems Includes techniques applied to new applicationsCatalogus bij een expositie van Israëlsche kunst en actuele joods-Russische kunst.The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-SiG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with Marichal's intuition that one of them had to be ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's Historiae. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the Historiae of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's Historiae greatly contribute. Conversion factors of SI and non-SI units. An introduction to soil humic substances. Variations between humic substances isolated from soils, stream waters, and groundwaters as revealed by 13C-NMR spectroscopy. Synthesis and degradation of natural and synthetic humic material in soil. Selected methods for the characterization of soil humic substances. Nitrogen in humic substances as related to soil fertility. Roles of organic matter, minerals, and moisture in sorption of nonionic compounds and pesticides by soil. Effects of humic substances on plant growth. Ecological aspects of soil organic matter in tropical land use. Humic and fulvic acid fractions from sewage sludges and sludge-amended soils. Application of nuclear magnetic resonance spectroscopy to whole soils. Humic substances in soil and crop sciences: an overview.Reports, Documents, and Journals of the U.S. Senate and House of Representatives.Karl May: Der schwarze Mustang Von Dr. Karl May. Oft wird Heidegger unterstellt, er wolle diese Trivialität und damit rationale Maßstäbe des Denkens und Sprechens unterminieren. Diese Studie gelangt dagegen zu einer Neubewertung der Überlegungen in Sein und Zeit. Heideggers Innovation besteht in der Pluralisierung des Wahrheitsbegriffs: Einerseits rekonstruiert er eine geläufige Vorstellung von wahren als tatsachentreen Sätzen, andererseits reserviert er für die Bewertung philosophischer Analysen ein ganz eigenes Wahrheitskonzept.This text provides in modern English the bulk of the literary output of Hans Denck (1500-1527), one of the lesser reformers and a pathbreaker of undogmatic Christianity whose Christian humanist notions attracted many of his contemporaries. Denck's eirenlial spirit and his profound spirituality are fully reflected in these translations, which include scripture and general indexes."The manual contains many sample analyses and discussions so that users can acquaint themselves with the suite quickly and easily."--BOOK JACKET.Design practice in offshore geotechnical engineering has grown out of onshore practice, but the two application areas have tended to diverge over the last thirty years, driven partly by the scale of the foundation and anchoring elements used offshore, and partly by fundamental differences in construction and installation techniques. As a consequence offshore geotechnical engineering has grown as a speciality. The structure of Offshore Geotechnical Engineering follows a pattern that mimics the flow of a typical offshore project. In the early chapters it provides a brief overview of the marine environment, offshore site investigation techniques and interpretation of soil behaviour. It proceeds to cover geotechnical design of piled foundations, shallow foundations and anchoring systems. Three topics are then covered which require a more multi-disciplinary approach: the design of mobile drilling rigs, pipelines and geohazards. This book serves as a framework for undergraduate and postgraduate courses, and will appeal to professional engineers specialising in the offshore industry.The first comprehensive, archive-based history of Russia's original annexation of Crimea and its predominantly Muslim population more than two hundred years ago Russia's long-standing claims to Crimea date back to the eighteenth-century reign of Catherine II. Historian Kelly O'Neill has written the first archive-based, multi-dimensional study of the initial "quiet conquest" of a region that has once again moved to the forefront of international affairs. O'Neill traces the impact of Russian rule on the diverse population of the former khanate, which included Muslim, Christian, and Jewish residents. She discusses the arduous process of establishing the empire's social, administrative, and cultural institutions in a region that had been governed according to a dramatically different logic for centuries. With careful attention to how officials and subjects thought about the spaces they inhabited, O'Neill's work reveals the lasting influence of Crimea and its people on the Russian imperial system, and sheds new light on the precarious contemporary relationship between Russia and the famous Black Sea peninsula.Dass steigender Wohlstand, Ausdehnung der Selbstbedienung nach US-amerikanischem Muster und wachsende Müllberge zusammenhängen, stellt für aufmerksame Zeitgenossen keine Neuentdeckung dar. Die Fragen zum komplexen Hintergrund dieser 'Verpackungsrevolution' - seit den fünfziger Jahren hat sich das Volumen des Verpackungsmülls von 10 auf über 120 kg pro Kopf verzwölffacht - blieben bisher jedoch unbeantwortet. In seinem umwelthistorischen Beitrag, der insbesondere den Teilbereich der Lebensmittelverpackungen zum Gegenstand hat, versucht M. Nast, diese Forschungslücke zu schliessen. Mit der Rolle der Verpackung im Marketing-Mix, der Lancierung der Selbstbedienungsläden, der Haushaltstechnisierung, dem Aufkommen neuer Ernährungsstile sowie der Diskussion um Methoden zur Abfallverminderung werden alle Probleme besprochen, die im Zusammenhang mit der Produktion, Verwendung und Entsorgung von Lebensmittelverpackungen aufgetreten sind. Da der Verfasser das Thema in die These des «1950er Syndroms» einordnet, kommt der Frage, welche Auswirkungen der Rückgang der relativen Preise für fossile Energieträger seit den späten 1950er Jahren auf den Verpackungsmarkt hatte, zentrale Bedeutung zu.Includes proceedings of special meetings, numbered & unnumbered; the 1973 (Dublin) spec. meeting also called 9th.Beginning with v. 67 (1960/61) issued in separate parts called "teilausgabe": [1] Bund [2] Land Baden-Württemberg.
